

3 Legit Ways to Profit with WordPress

by [Plugin Poets](#)

Introduction

WordPress is the world's most popular blogging platform, which makes it a great way for you to earn an income.

Here are 3 legit ways to profit with WordPress:

1. Create an affiliate site

What is an affiliate site?

An affiliate site is simply a website that has links to products. Once clicked, the link will lead you to the product page. You earn a commission each time someone purchases a product through that link.

A great example of an affiliate site is a product review site. People who visit your site are already interested in purchasing the item. If they are satisfied with your review and what the product has to offer, they will most likely purchase through the link you have on your site.

Companies like Amazon offer affiliate programs. Make sure to check the terms and conditions of each program before joining.

2. Set up WordPress sites for others

Creating a WordPress site, though simple, isn't easy for everyone. Others may just not have time to focus on this and would rather prioritize other parts of their business. This gives you another opportunity to earn with WordPress: by setting up WordPress sites for others.

Here are the steps to consider when setting up WordPress sites for others:

1. Properly install WordPress.

If you are not keen on installing WordPress manually, you can check other programs like Softaculous and QuickInstall to help you install WordPress almost instantly.

You may also check our special report "8 Things You Need to Do After Installing WordPress."

2. Add essential plugins.

WordPress comes with thousands of free and paid plugins with different functionalities.

Remember to only use plugins beneficial for your website; having many unnecessary plugins could slow down your site.

Here are some essential plugins we recommend:

- WP Super Cache - for caching
- UpdraftPlus Backup/Restore - to easily back up and restore your WordPress site if problems occur

3. Add awesome themes.

WordPress comes with default themes. If none of these fit the site you're making, don't worry — you can easily change these.

Make sure to use a theme that best fits the style of your site.

You may check our special report "20 Awesome Free WordPress Themes for 2020" to learn more about different available themes.

4. Configure WordPress.

This last step helps create a better WordPress site by making sure the settings are optimized. This includes using only the necessary plugins and themes and disabling or even deleting those you don't need.

You can check our report "8 Things You Need to Do After Installing WordPress (for Beginners)." This report will help you configure your new WordPress site.

3. Build and sell site

Some people are interested in affiliate marketing but can't be bothered with building their own WordPress site. This gives you another window of opportunity to earn.

This means building a WordPress site from scratch. You can follow the steps in the second part of this report, but it doesn't end there.

In order to build a full site, you'll need to add content or posts. You may need to add at least 10 blog posts, complete with pictures and videos, before you can start selling your WordPress site.

If you haven't found someone to create a WordPress site for, you can also build and sell affiliate sites like product review sites or niche-based sites.

There are other ways to profit with WordPress, but these are the easiest ways. Use any (or all) of these and you'll surely earn more income.

To more profit with WordPress!
